[ICD 10 HD 2012](#)

[ICD 10 Doc Guide](#)

ICD 10 Lite 2012 iPremium Apps

for Android 2.3.3 - 2.3.7

- **Claim/Purpose** - The 2011 ICD 10 Premium diagnosis codes are instantly searchable and also browsable by their traditional categories. Search by code or diagnosis, through the whole ICD10-CM or through just a category or selected nonspecific code. Images within the list indicate whether a code is specific or nonspecific. Tap to view the diagnosis and the full text of its standard ICD-9 long description and to add it to your Favorites list for immediate access later.
- **Rating/# Ratings-** 4.1 stars/175 in google store, many seem to be written by the same (paid) people because they have the same spelling errors.
- **Installs** - 10k-50k
- **Cost** – FREE
- **Physician Champion Note** – Voice enabled, user friendly, and easy to use. Screen forwarding to: email, Bluetooth, Skype , and voice commands. Can easily search common words; e.g. heart failure, infarction.
- **Clinical Documentation Specialist Review Notes** - Android: Best app is the ICD 10 lite 2012 iPremium Apps (Free). The ICD 10 HD 2012 by iPremium has only HCPCS codes at \$1.99 extra. They are both voice enabled, which make search more practical. They share Similar features as the ICD 10 HD 2013 (Farhat) & Juan Garcia on iPhone/iPad devices.

ICD 10 HD 2012 iPremium Apps

for Android 1.6 and up

- **Claim/Purpose** - The 2011 ICD10-CM diagnosis codes are instantly searchable and also browsable by their traditional categories. Search by code or diagnosis, through the whole ICD10-CM or through just a category or selected nonspecific code. Images within the list indicate whether a code is specific or nonspecific. Tap to view the diagnosis and the full text of its standard ICD-9 long description and to add it to your Favorites list for immediate access later. The same features are available for the ICD10-PCS procedure codes, too, used primarily for facility billing: search, browse, view long descriptions, and add to your Favorites list.
- **Rating/# Ratings**- 3.9 stars/14
- **Installs** – 100-500
- **Cost** – \$1.99
- **Physician Champion Note** – Same as the Lite version (slide 2). Bonus is the addition of HCPCS Codes set for outpatient and ICD 9 CM/PCS as options
- **Clinical Documentation Specialist Review Notes** - The ICD 10 HD 2012 by iPremium has HCPCS codes for \$1.99, compared with the free edition.
- **Link** – <https://play.google.com/store/apps/details?id=com.ipremiumapps.icd10cm.premium&hl=en>

ICD 10 Doc Guide Precyse Univ

for iOS 5.0 or later, iPad. Android 2.0 and up

- **Claim/Purpose** - Allows the user to enter the name of a condition or disease and receive the documentation tips and strategies to document the medical record with the specificity required for ICD-10, as well as improved documentation in ICD-9. This app is perfect for physicians, nurses, clinical documentation improvement specialists, and other clinicians who need a tool to quickly retrieve information on how to document the most common diseases and conditions.
- **Rating/# Ratings** – iOS: Has not received enough ratings to display an average for the current version of this application. This app does not actually provide ICD-10 codes. It does what it says; provides strategies for optimizing coding in ICD-10. However, since there are no codes, and most strategic items in the list require you to identify a code, there is no way to use it except to jump back and forth between this app and a code app, which is very inefficient. The strategies make sense, but the list is rather short. Easy to use and has the option to browse alphabetically, but has very few diagnoses.

Android: 2.9/9

- **Installs** – 1000-5000 Android. Apple doesn't report this info.
- **Cost** – Free
- **Physician Champion Note** – Style: search box with option for first letter of the word alpha "browse". Pros: gives hints about a genera - for pneumonia, it does not make you dive into ICD10 detail , but does give a sense of what kind of detail you need. Cons: no PCS. Search is horrible.

TOP THREE IOS APPS for ICD-10

ICD 10 HD 2013

ICD 10

ICD 10 Mobile

ICD 10 HD 2013 Eslam Farhat

Requires iOS 4.3 or later. Comp w iPhone, iPad & iPod touch. Optimized for iPhone 5

- **Claim/Purpose** – The 2012 ICD10-CM diagnosis codes are instantly searchable and also browsable by their traditional categories. Search by code or diagnosis, through the whole ICD10-CM or through just a category or selected nonspecific code. Images within the list indicate whether a code is specific or nonspecific. Tap to view the diagnosis and the full text of its standard ICD-10 long description and to add it to your Favorites list for immediate access later. Also shows mapping to ICD-9 and type of mapping, direct or approximate.
- **Rating/# Ratings** – 4.0/26. "The App is lacking a thorough search for converting index names of diseases to tabular diseases and procedures. This is for both CM and PCS when compared to ICD9 it should provide a choice to areas from ICD9 terminology to sections in ICD 10, this App is not there yet it needs more work!"
- **Installs** – Apple doesn't report this info.
- **Cost** – \$1.99
- **Physician Champion Note** – Kind of like this one as well. Style: chapter browse with search and favorites. **Pros:** includes PCS. Search refines as you type words, rather than waiting for full word - useful for catching typos. Generic codes noted with color icon and if selected give alternatives but you have to page into the alternatives. **Cons:** takes over a minute to load database for first run.
- **Clinical Documentation Specialist Review Notes** – Coding oriented. App crashed several times on iPad, when browsing procedures.
- **Link** – <https://itunes.apple.com/us/app/icd-10-hd-2013/id435279707?mt=8>

ICD 10 Juan Garcia

Requires iOS 4.3 or later. Comp w iPhone, iPad, & iPod touch. Optimized for iPhone 5

- **Claim/Purpose** – ICD10 2012 consists of a tabular list containing a numerical list of the disease code numbers in tabular form, an alphabetical index to the disease entries; and a classification system for surgical, diagnostic, and therapeutic procedures. Not much of a description, but screen shots look like it's a basic search app.
- **Rating/# Ratings** – Has not received enough ratings to display an average for the current version of this application.
- **Installs** – Apple doesn't report this info.
- **Cost** – \$5.99
- **Physician Champion Note** – Style: menu of all ICD10 organized by ICD10 chapters with associated submenus. **Pros:** simple to navigate menu, easier to read than Black Night version. Can set favorites. Menu refines as you enter in search field. Has procedure codes as well. Specific vs generic DX flagged. **Cons:** search box does not accept common pseudonyms.
- **Clinical Documentation Specialist Review Notes** - Easy to navigate, use common words as nstemi, stemi, infarction, fracture, failure, Procedures will be easy to navigate only if surgeon are given the ICD 10 new definition for types of procedure
- **Link** – <https://itunes.apple.com/us/app/icd10/id446693950?mt=8>

ICD 10 Mobile Svm Soft

Requires iOS 6.0 or later. Comp w iPhone, iPad, & iPod touch. Optimized for iPhone 5.

- **Claim/Purpose** – Search results are highlighted for better diagnose.
Search as you type with fast search engine.
Capability to search codes by CODE or symptoms, name, description or details.
ICD-10-CM Codes updated to 2014.
Option to tag codes as favorites for easy remember.
Option to share codes by email with anybody.
Option to print codes via Airprint.
Universal app for iPhone/iPod/iPad.
Browse codes by chapters and subgroups.
Clean and beautiful optimized interface.
Full iOS 7 Support.
- **Rating/# Ratings** – Has not received enough ratings to display an average for the current version of this application.
- **Installs** – Apple does not report this info
- **Cost** – \$3.99
- **Physician Champion Note** – Style: chapter browse with search and favorites. Pros: UI is easy on the eyes, fast, search refines as you type which can help catch typos. Cons: no PCS. Does not display options for generics, but info does make repeat search more specific fairly easy.
- **Clinical Documentation Specialist Review Notes** - Better breakdown of diagnosis. Red dot indicate the diagnosis can further be sub classified. Easy to search common terms such as respiratory failure, heart failure. The classification per chapters make it easy to navigate.
- **Link** – <https://itunes.apple.com/us/app/icd-10-mobile/id403355307?mt=8>
