REFLEX/CONFIRMATORY TESTING NOTICE

It is the policy of Providence Alaska Medical Center laboratory to perform reflex or confirmatory test automatically on microbiological cultures (gram stain, bacterial identification and susceptibility, if warranted, unless otherwise requested), negative Rapid Strep Screen (culture), positive HIV (Western Blot), positive Hepatitis B Surface Antigen test, positive, reactive RPRs (FTA-Abs), CSF or Body Fluid Cell Count, Lipid Panel Triglyceride >400mg/dL (direct measure LDL), and CSF Cell Count, Malaria smear, CBC/Blood Count (Pathologist review). CBC will be ordered if not completed within 24 hours of flow cytometry request. Many of these tests are also available without confirmation, if desired. Transfusion Medicine will perform additional testing as needed to identify auto- and allo-antibodies, and/or to provide compatible blood products for transfusion. The subsequent testing is performed at additional charge. Medical necessity must apply to the reflex test also. Refer to Providence Alaska Medical Center laboratory's Testing Manual for details.
