WEEK 6: INTRODUCTION & INSTRUCTION

Visit this link to download the MedBridge Go app to access the exercise videos with a brief description of each exercise: <https://www.medbridgeeducation.com/medbridge-go/>. For each day, enter the corresponding ACCESS CODE to see the videos in order:

DAY	ACCESS CODE
WEEK 6 DAY 1	88ZQEQXD
WEEK 6 DAY 2	ZPG7V7D4
WEEK 6 DAY 3	EQ3YZTJM
WEEK 6 DAY 4	KX8KWFKR
WEEK 6 DAY 5	XNF4XCNK

Follow the program below for all information regarding, sets, reps, and rest. For each exercise, if you are to HOLD a specific static position, you will see the word “hold” next to the prescribed amount of time. If you don’t see the word “hold”, then perform reps of the exercise continuously or the prescribed amount of time. Otherwise, simply perform the amount of repetitions prescribed for one of both sides of your body.

PERFORMANCE FITNESS: USE RPE TO GUIDE YOU

Follow the scale below to select the correct Rate of Perceived Exertion (RPE) working intensity for your activity. Implementing an RPE (Rate of Perceived Exertion) scale can offer great subjective feedback on how you perceive how hard you are working. The RPE scale we are using is rated from 0 to 10 as outlined below. You will see parts of the performance program that prescribe you to work hard enough to match a specific number on the scale. Over the course of the program, we have assigned to you a very specific progression of the intensity of the work you perform. Give your best effort to match the prescribed RPE for the work you do and stick to the prescribed number each week for the specific activity. This can help you not only optimize your performance over the course of the program, but it can also help you reduce your risk of injuries.

There are explanations to the scale below to give you a better understanding of what the RPE rating should feel like. For example, an RPE of “zero” means you aren’t working at all, you are just standing still at rest. On the opposite end of the RPE scale at level “10” is like maximal sprinting for as far as you can go; if you rate something as a “10” it’s because you feel like this is the hardest level of work you can possibly perform.

RPE RATING	PERCEIVED EXERTION	EXPLANATION
0	Total Rest	Standing still
1	Very Easy	Very slow walking
2	Easy	Easy walking
3	Moderate	Brisk walking pace, easy dribbling, throwing, catching, shooting
4	Moderate	Comfortable jogging pace, but you notice breathing harder
5	Difficult	An advanced jogging pace, but you can maintain for a while
6	Hard	An advanced jogging pace, you are tired but can continue
7	Really Hard	A challenging run, you can hear your breathing
8	Really Hard	A challenging run, you can only use 1-word answers in conversation
9	Incredibly Hard	Breathing is vigorous, you can’t sustain the pace for long
10	Maximal effort	The hardest you can possibly go, in short bursts only

WEEK 6

DAY 1

	<u>SETS</u>	<u>REPS /TIME</u>	<u>REST</u>
