

Get involved in type 1 diabetes research at

Providence Pediatric Endocrinology

A future without T1D starts with you.

What is TrialNet T1D Risk Screening?

TrialNet screening is unique. A simple blood test can identify up to five autoantibodies that signal an increased risk of type 1 diabetes (T1D). These autoantibodies may show up years before symptoms appear.

TrialNet T1D Risk Screening is Free

TrialNet screening is free, easy, and the results are super important. If you have a history of type 1 diabetes in your family, you may be eligible for T1D risk screening at no charge to you:

Anyone between the ages of 2.5 and 45 with a sibling, child or parent with type 1 diabetes.

... or ...

Anyone between the ages of 2.5 and 20 with a sibling, parent, cousin, uncle, aunt, niece, nephew, grandparent or half-sibling with type 1 diabetes.

Sign up now, or walk-ins welcome

If you can't make this event, we can schedule an appointment or mail a test kit to you.

Get Screened!

Friday, Oct 11, 2019
1 pm - 6 pm

Providence Pediatric Endocrinology
at Basecamp
1st Floor
Mother Joseph Pavilion
9427 SW Barnes Rd
Portland, OR 97225

Why get screened?

- T1D family members have a 1 in 20 risk of developing the disease. That's a 15x greater risk than the general population risk of 1 in 300.

- TrialNet screening reveals if you or your child are in the early stages of T1D.
- The ability to screen for risk of T1D provides an opportunity to participate in research that aims to prevent disease progression.
- Participants receive close monitoring; their risk of being DKA diagnosed in diabetes ketoacidosis (DKA) decreases from 30% to less than 4%.
